

MESSAGE FROM THE CHAIRMAN

On behalf of the Technical and Local Committee of the IEEE International Conference on Imaging Systems and Techniques (IST 2010), I welcome you in the historical and beautiful city of Thessaloniki, Greece. Thessaloniki is one of the largest cities of Greece with great historical and cultural significance, and capital of the Greek region of Macedonia, owing its name to the sister of Alexander the Great named Thessaloniki. It is a major Mediterranean port city built amphitheatrically and located in the northern part of Greece in a unique geographical location surrounded by sea and mountains, in the vicinity (50 km) of the secluded peninsula of Chalkidiki, where the great Greek philosopher Aristotle was born and taught. Thessaloniki is considered a cultural, touristic, industrial, commercial and political centre and a major transportation hub for the rest of southeastern Europe.

This is the seventh consecutive year, following the successful IST events held previously in Stresa, Italy; Niagara Falls, Canada; Minori, Italy; Krakow, Poland; Chania, Greece; and Shenzhen, China. This event series has allowed scientists from all over the world to meet to explore the physical and engineering principles, development and applications of new imaging technologies, systems, measurements, and techniques. IST offers an informal setting devoted to the encouragement of broad discussion of imaging methodologies, shaping the future, and identifying emerging imaging trends. This workshop deals with the design, development, evaluation and applications of imaging systems, instrumentation, measuring techniques, and image processing algorithms, aimed at enhancing the detection process and image quality.

I would like to thank and highlight the outstanding efforts of the Local Committee Chairs and Honorary Chairs: Professors Maria Petrou (Centre for Research and Technology Hellas (CERTH, Greece); Theodore Laopoulos (Aristotle University of Thessaloniki, Greece); Konstantina Nikita (National Technical University of Athens, Greece), and Wuqiang Yang (University of Manchester, UK). I would also like to extend my thanks to the Technical Co-Chairs: Professors Matteo Pastorino (University of Genoa, Italy), Dimitrios Karras (Technological Educational Institute of Chalkida, Greece), Prof. Cesare Svelto (Polytechnic of Milan, Italy), Mihalis Zervakis (Technical University of Crete, Greece), Mohd Zaid Abdullah (Universiti Sains Malaysia), Michele Ceccarelli (University of Sannio, Italy), Basil Mertzios (Democritus University of Thrace, Greece), Dr. George Zentai (Varian Medical Systems, US), Prof. Antonios Gasteratos (Democritus University of Thrace, Greece), and the Coordinator of the event Dr. Angelos Amanatiadis (Democritus University of Thrace, Greece).

Many thanks go to the dedicated reviewers which did an excellent job to preserve quality and promote academic excellence and scholarship. Special acknowledgements to the Workshop Administrator, Chris Dyer (Conference Catalysts, LLC) for his outstanding support and dedication. I hope you enjoy your stay in Thessaloniki, Greece, and find the 2010 IEEE International Workshop on Imaging Systems and Techniques (IST2010) a rewarding opportunity for advancement of knowledge and technical competencies.
